

**AMENDMENTS TO THE SPECIFICATION:**

Please replace paragraph [067] with the following amended paragraph:

[067] **FIG. 6** shows an example of a tool ~~700~~800 that can be utilized in a tool interface (not shown) as described above. The tool interface arranged to accommodate tool 701 can be any of the interfaces discussed above. As such, tool end 701 can be a hex driver or Allen wrench, a ball driver, a screw driver, or any other tool. In some embodiments, tool end 701 can be a spanner wrench or other wrench. In some embodiments, tool ~~700~~800 includes a tool driver 702 that allows the user to rotate tool end 701. As such, tool driver 702 can be a handle or knob large enough to allow a user to rotate tool end 701 in a tool interface. In some embodiments, tool driver 702 may be a remotely controlled motor that allows the user to rotate tool end 701 as desired without approaching or directly touching adjuster 100.
